

MOLECULAR FOUNDRY USER MEETING

August 21–22, 2019

A NANOSCIENCE CONFERENCE AT LAWRENCE BERKELEY NATIONAL LABORATORY

Keynote Speakers:

Cherry Murray, *Professor of Physics and Director of Biosphere 2 Institute, University of Arizona*

John Rogers, *Louis Simpson and Kimberly Querrey Professor of Materials Science and Engineering, Biomedical Engineering and Neurological Surgery, Northwestern University*

Breakout Symposia:

- **Materials and Devices for Brain-Like Computing**
- **Metal Halide Perovskites – Opportunities, Challenges, Future Directions**
- **Quantum Sensing Chemicals and Earth Systems**
- **Multimodal In Situ Methods at the Materials Interface**
- **Materials Discovery and Design to Enable a Circular Materials Economy**
- **New Directions in Phase Contrast Electron Microscopy**
- **Cutting-Edge Research at the Bio/Nano Interface**
- **Next-Generation Quantum Materials for Coherent Transport and Emission Phenomena**

Open to all researchers, from academia, industry, and government labs
